## DETAILED ACTION

### *Election/Restrictions*

1. Claims 3-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 15, 2005.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Orr (US 1,214,709).

As to claim 1, Orr discloses a wire rope and socket combination; comprising:

a wire rope socket **10**:

a rope formed of strands **a** of twisted wires extending into the wire rope socket;

strands **a**<sup>1</sup> of the twisted wires being bent over 180 degrees within the wire rope socket;

strand **a**<sup>2</sup> of the twisted wires remaining unbent (strand **a**<sup>2</sup> is not deformed or bent, instead the strand is non-deformingly bowed due to the natural malleability and flexibility of the material of the strand; page 2 lines 2-10) within the wire rope socket, wherein the selection of the number of strands of twisted wire bent over 180 degrees

Art Unit: 3679

and the selection of the number of strands of twisted wire remaining unbent are made to set the breaking strength of the wire rope socket; and

babbit **19** securing the rope in the wire rope socket (Figures 1 and 4).

As to claim 2, Orr discloses a wire rope and socket combination wherein the wire rope socket **10** has a tapered bore, and the bent strands **a<sup>1</sup>** are bent in the direction of narrowing of the tapered bore (Figure 1).

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaw (US 5,136,755).

As to claim 1, Shaw discloses a wire rope and socket combination; comprising:

a wire rope socket **20**:

a rope formed of strands **11,13** of twisted wires extending into the wire rope socket;

strands **11** of the twisted wires being bent over 180 degrees within the wire rope socket;

strand **13** of the twisted wires remaining unbent within the wire rope socket, wherein the selection of the number of strands of twisted wire bent over 180 degrees and the selection of the number of strands of twisted wire remaining unbent are made to set the breaking strength of the wire rope socket; and

babbit **29** (formed by melting strands **11**; column 8 lines 51-58) securing the rope in the wire rope socket (Figures 8-11).

Art Unit: 3679

As to claim 2, Shaw discloses a wire rope and socket combination wherein the wire rope socket **20** has a tapered bore, and the bent strands **11** are bent in the direction of narrowing of the tapered bore (Figures 9 and 11).

### ***Response to Arguments***

5. Applicant's arguments filed December 29, 2005 have been fully considered but they are not persuasive.

As to claim 1, Attorney argues that:

Orr does not disclose a wire rope and socket combination wherein *one or more of the strands of the twisted wires remain unbent within the wire rope socket*.

Examiner disagrees. As to claim 1, Orr discloses a wire rope and socket combination wherein strand **a<sup>2</sup>** of the twisted wires remain unbent (strand **a<sup>2</sup>** is not deformed or bent, instead the strand is non-deformingly bowed due to the natural malleability and flexibility of the material of the strand; page 2 lines 2-10) within the wire rope socket **10** (Figure 1).

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3679

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
